# From the Editor

Hello guys, I'm Thuvaragan GANESHALINGAM, the editor. The writing team is composed of Hamza DEHMEJ, Souleymane DIOP, Arda OZCAN, Athisajan PARAMSOTHY. I wish to thank you for reading our monthly magazine.

We are more and more exposed to fake news. In view of the increase of dangers caused by fake news, my writing team and I decided to create this magazine in the purpose of fighting them. Indeed, the purpose of our magazine is also to help you in finding the difference between the real and the fake news. We will present you with a few news every month. Even if some news seems to be real, it isn't the case for all the news. Indeed, your task is to sort out the truth from the false.

If you want to know more information about fake news, you can find the interview of a fake news specialist named Youssef SOUDKI in our new monthly podcast named RANDOM PODCAST. He will explain in this podcast the history of fake news but also their uses and also the way to find them. You can also find this news from the magazine in the podcast hosted by me with the participation of the writing team and a mystery guest.

Now you have to spot out this fake news. Are you ready? Good luck and enjoy your reading !

## **Xiaomi SU7: the new game changer in the automobile industry?**

Everyone has once in their life heard about Xiaomi. Xiaomi is a well-known Chinese brand all over the world, especially in the smartphone industry. As usual, Xiaomi decided to impress their fans by launching their new car, the Xiaomi SU7, in despite of American sanctions like Huawei, which sparked controversy.

Xiaomi has announced its brand new SU7 at the end of February, with unlimited mileage and the most powerful engine ever created in the world. Xiaomi had put all their know-how in this car. Indeed, the Xiaomi SU7 is equipped with the new nuclear battery made by the Chinese startup Betavolt. This new technology of battery has a battery-life of 95 years which makes this car endless. With this car you can power your whole house for years and years. You can consider that you have a small nuclear reactor at home. That's not all, it's also a performance beast. Indeed, the car has a 4 000 HP engine which made this car the fastest car in the world, even faster than the Bugatti Bolide which currently holds the record. It goes from 0 to 100 km/h in less than 1.2 seconds. The car is powered by HyperOS and enhanced with the power of the Xiaomi AI which allows you to drive the car with a Xiaomi phone like the game Asphalt 9.

### **Duolingo: the judged app for harassment**

For those who are not familiar with it, although I doubt there are many, I will still explain what it is. Duolingo is a very popular language learning platform, available on various devices. Its main goal is to help users learn a new language, be it English, French, Spanish, Turkish, etc.

Every day, users receive notifications encouraging them to do their daily exercises to maintain their progress in language learning. However, despite the good intentions of these reminders, some people found them too insistent and perceived them as harassment. We have the testimony of a journalist who says, I quote, "thanks to the cookie and data retrieved from users, the app can track users' activities and send them a message at an inappropriate time."

Over time, these complaints began to accumulate, and eventually, several users decided to take the matter to court. After five long years of litigation, the court finally ruled in favor of the plaintiffs, condemning the Duolingo app to pay a colossal fine of \$55 million for the harm caused by its deemed excessive notifications.

## **The most aged dinosaur footprint tracks in the american continent**

Across the world, a summer of drought revealed long-submerged relics. In Texas, United States, Dinosaur Valley State Park made an extraordinary discovery: dinosaur footprints. These are the oldest dinosaur footprints ever found on Earth. These footprints, dating back millions of years, were preserved under layers of sediment, clay, and limestone. The drought lowered the level of the Paluxy River, exposing these millions-year-old tracks, before rains submerged them once again.

The park estimates these footprints to be over 113 million years old, potentially making them the longest tracks left by a single dinosaur in North America. Park officials stated that many footprints appear and disappear throughout the park depending on the weather. These particular footprints were last visible 20 years ago.

This is a fascinating discovery that provides us with a rare glimpse into the ancient history of our planet and reminds us of the once-dominant presence of dinosaurs on Earth.

## The parkour of Caltech and NASA's Partnership in Forming JPL

The collaboration between the California Institute of Technology (Caltech) and NASA to create the Jet Propulsion Laboratory (JPL) stands as a cornerstone in the realm of space exploration. This partnership has led to pioneering advancements that have significantly broadened our understanding of the universe.

In the 1930s, a visionary group of Caltech students and faculty, led by Theodore von Kármán, laid the foundation for JPL by emphasizing the potential of rocketry. Initially focusing on rocket propulsion, JPL's trajectory changed with the birth of NASA in the 1950s, thrusting it into the forefront of space exploration missions.

JPL's achievements, including the historic Viking 1 Mars landing in 1976, underscore the laboratory's crucial role in expanding our cosmic knowledge. Leveraging Caltech's scientific and engineering expertise alongside NASA's resources has allowed JPL to lead missions to Mars, Jupiter, and beyond.

This enduring partnership exemplifies how collaboration can drive scientific discovery, pushing the boundaries of human knowledge and exploration. As JPL continues to embark on ambitious projects, its legacy of innovation and discovery is a testament to the fruitful collaboration between Caltech and NASA.

## The Anomax's Tragedy

The last week, an incident took place, in an industrial complex of aluminum in the State of Georgia ; du to a chemical problem during the treatment of the aluminum, called the "anodisation". Moreover, the site has been exposed to high levels of radiation, after few sections explodes within. The following hours, local authorities have to evacuate the complex, and a large part of Albany's civilians leaving near the factory. According to the State's governor Briam Kemp, fires have also been declared during theses days, breeding to massive pollution of the ground and the Flint River, who was nearby. The Federal Government was also implicated, sending Canad'air and militaries units to countain the disaster.

The Involvement of N.G.O.s

After the accident, few non-governmental organizations have protested to call for

the closing of the Anomax Company, materialized by violent confrontations around the site and in front of the Anomax's social siege, destabilizing the legitimacy of the industrial who must justify himself to the population. Others personalities support the NGO's actions to make companies aware of their responsibilities in front of their salaries and their consumers. The situation still unstable for now but everyone agreed that the Anomax Compagny is no more, and can't recovery himself from that incident.

# MOMENT OF TRUTH

**Xiaomi SU7: the new game changer in the automobile industry?:**

This article was made up, it's a mix between two real news and my imagination. In fact, the car has been launched at the end of february. And there was also a prototype of a nuclear battery announced by Betavolt although it was destined for smartphones.

-Thuvaragan

**Duolingo: the judged app for harassment:**

The Duolingo article is completely false; it was invented from beginning to end.

-Arda

**The most aged dinosaur footprint tracks in the american continent:** My news about the longest track is true and it shows us how much we have just explored 1-2% of our world.

-Athisajan

**The parkour of Caltech and NASA's Partnership in Forming JPL**

For the JPL one, even if it seems crazy to have a Partnership with Nasa in the early 30's it is absolutely true and you can check the source out on nasa.gov

-Souleymane

**The Anomax's Tradeegy :** That information was obviously a hoax. In fact, the Anomax Company is a french industrial who's not located in USA, however, it specialized in the treatment of titanium and aluminium for others industries. The rest of the story was all invented but the details as the governor's name or the existence of the Flint River is real.

-Hamza

# GAME & FUN

## Possible or impossible ?

Are this sodoku and this crossword puzzle solvable or not ?

**Across**

- 1 Enmity (3,5)
- 5 Musical notation written on a stave to indicate pitch of the following notes (4)
- 9 Meeting of witches (5)
- 10 Conscript (7)
- 11 Soft news — fit man in tone (anag) (12)
- 13 With hands on hips, elbows out (6)
- 14 Large vessel with handle and spout for pouring drink (6)
- 17 Line of latitude marking the point where, on the winter solstice, the sun will not rise above the horizon (6,6)
- 20 Pipe for firing poison darts, say (7) 21 Baby wise bird? (5)
- 22 Tudor flower? (4)
- 23 Tempest with frozen rain (3,5)

**Down**

- 1 Brandenburg concertos composer (4)
- 2 Find the word
- 3 Structure on the River Thames (6,6)
- 4 Trying experience (6)
- 6 Rotating tool for shaping metal or wood (5)
- 7 Brief (8)
- 8 Filled with excessive vanity (12)
- 12 Where to find bowls filled with lettuce, tomatoes etc (5,3)
- 15 Robotic space probe launched in 1986 to explore Jupiter and its moons (7)
- 16 Widely admired as being an outstanding example (6)
- 18 Find the word
- 19 Stalk (4)

# THE WEATHER

for the next 7 days

## HOROSCOPE *From 3 april to 31 april*

**Aries:** you will be in a state of success in many cases. You will be happy with your growing steps

**Taurus:** you will be in constant confrontation to earn progress in the fields of livelihood.

**Cancer:** you will be blessed with good health and your work-life will continue to make your life simple and pleasant.

**Virgo:** you will be in full effort to increase their work and increase their prestige in the home and society.

**Scorpio:** it will be more willingness to settle the disputes with you . However, you will need to spend more money during this time to fulfil these efforts.
